

NOURISH SCRUB 1 oz

Nourishing exfoliating scrub

Deep and gentle scrub for a radiant boost.

Jojoba seed oil (3%): The liquid wax contained in the jojoba seed is known to help reduce scarring.

Jojoba Esters: Wax esters are naturally present in the skin's corneum stratum that hold sebum, dead cells and water among other. This constitutes a barrier against dehydration.

Similarities between skin's wax esters and those of jojoba make it an excellent active ingredient for nourishing skin.

They are very close to human sebum and help regulate sebaceous glands secretion.

Therefore, they benefit both dry and oily skin.

Coconut and apple juice: they form a gentle cleansing base which, in contact with water, transforms into cleansing micelles.
